

Blue Shark Power Chair

TECHNICAL NOVELTIES FOR EVERY DAY COMFORT

BLUE SHARK is a power chair on a six wheeled chassis. All wheels are equipped with suspension which makes driving comfortable and more stable on uneven surfaces.

BLUE SHARK is middriven and the chair can turn on the spot. This means it is easy to manoeuvre in narrow spaces.

BLUE SHARK is equipped with electrical seat lift and tilt as standard. Seat and back rest are ergonomically developed for greatest possible comfort.

BLUE SHARK has upholstery of fireproof foam. The seat material is Vienna microfibre, a machine washable fabric with a comfortable suede texture in optional colours

BLUE SHARK is operated by a joy stick from Dynamic. The joy stick is parallel shifted for easy access to a table.
