

Relax in Comfort - Rise with Ease!

THE VITAL RISER-RECLINER MAKES YOUR LIFE MORE COMFORTABLE

VITAL 200 is a riser-recliner chair designed for people who spend a large amount of the day sitting down. Or you may find it difficult to rise from an ordinary arm chair.

In the **VITAL 200** you sit in comfort, easily vary your seated position and rise from the chair with minimal effort.

The **VITAL 200** has two motors hidden in the frame. The leg rest is independently operated which allows you to sit upright with your legs raised. The arm rests follow every movement of the chair, when rising or reclining.

The **VITAL 200** has a unique, horizontal seat lift to a maximum height of 78 cm. This means you are not tilted forward, or sliding out. You will need minimal arm strength to rise to your feet. The arm rests are long enough to keep your balance when rising or in a seated position.

The **VITAL 200** is also available in a smaller size, **VITAL 220**, suiting a person shorter than 160 cm. In all other respects the Vital 220 is identical with the 200 version.

Vito Vital

This chair will become your best friend!

The VITAL riser-recliners provide the user with a healthy, varied **comfortable sitting** position combined with **assistance to rise**. Sitting in a tiltable chair means **less pressure** on your spine or hips. The elevated leg rest relieves weary feet. Sore shoulders, elbows or wrists are also **relieved of pressure** when rising. The VITAL chairs are very **stable** with a low centre of gravity. The chair's **modern design** and choice of upholstery give the chair a **neat and contemporary** look. The optional **upholsteries are in microfibre** (washable suede), **calf skin** or **sheep skin in many colours**. The seat cover, arm rest pocket or foldable arm rest for sideways transfer can be ordered as accessories.

VITAL 200

Arm rest height
22 cm

Seat depth
45-50 cm

Seat height
48-78 cm
